

Mobile AdBlue Dispenser

Product Details

Product Name: Mobile AdBlue Dispenser

Product Brand: KELAS

MOQ: One 20' Container

Function: Filling urea solution

Delivery time: 15 days

Product model: KLS-FE-T200-SCM

Size: 1120*780*980(mm)

Place of Origin: Jiangsu, China (Mainland)

Product Description

Main Components:

Stainless Steel Automatic Nozzle, Transfer Hose, Mobile Trolley, Connector, Tube for Inserting into 200L Barrel, Meter, Filling Pump with 24 DCV power Supply etc.

Advantage:

1. This product adopts the voltage 220V.
2. Stainless Steel Automatic Nozzle has the function that upon the quantity of dispensing is up to the settings, then the nozzle would stop filling.
3. Meter can record filling quantity once and also cumulative filling quantities;
4. Mobile AdBlue Dispenser can also adopt the alternating current of voltage 110V and direct current of voltage 24V.
5. The AdBlue drum is put on trolley, which is convenient for moving AdBlue to any place.

Application:

Automobile Manufacturer, Fleet, Bus Companies, Transportation Companies, Filling Station, etc.

Our Company

Kelas Environmental Protection Technology Co., Ltd

-----the subsidiary company of Lopal Tech Co., Ltd

Jiangsu Kelas Environmental Protection Technology Co., Ltd. was established in August of 2009. Kelas is a high-tech manufacturer of AdBlue, filling equipment, industrial reductant for denitration, biodegradable coolant and other environmental products.

- With annual product capacity of 600,000T
- Production capacity of AdBlue filling equipments is up to 12,000 units.
- Jiangsu, Tianjin, Sichuan three factories.

Kelas has independently researched and developed AdBlue and filling equipment, and sets the first nationally AdBlue filling equipment standard: Q/3200KLS 03-2011.

In April, 2015, reported by consulting organization INTERGER. Kelas had 45% of market share, ranking at No.1 in Chinese market research.

Chinese AdBlue® consumption more than trebles in 2014

Integer Research's Beijing office updated its Chinese Adblue® market estimate in April 2015 and found that both AdBlue® production and consumption increased by more than 200% year-on-year in 2014, albeit from a very small volume in 2013. Chinese AdBlue® consumption totalled just over 111,000 tonnes, up 236% compared with 2013, driven by a strong government push for China IV, equivalent to the European standard, Euro IV.

According to Integer's research, there were about 100 AdBlue® producers in 2014, which is double the number reported in 2013. In 2014, Kelas was still the largest AdBlue® supplier, holding a market share of 45%, followed by Sichuan Meifeng, Yitong Environment and Tianjin Yuetai. However, we noted that most Chinese AdBlue® producers operate on a small scale, with average monthly sales lower than 20 tonnes.
